

Practical AI and data systems for governed, decision-ready operations.

ProfileAI helps government programs and federal contractors turn fragmented documents, spreadsheets, reporting processes, and operational knowledge into maintainable workflows and decision-ready outputs.

SBA-CERTIFIED SDVOSB · VIRGINIA-BASED SMALL BUSINESS · HUMAN-REVIEWED AI · FOCUSED PILOTS AND IMPLEMENTATION SPRINTS

01

CORE CAPABILITIES

Workflow and reporting modernization

Map owners, handoffs, source rules, review gates, and recurring reporting so teams can operate from one governed picture.

Data integration and decision support

Connect fragmented data to dashboard-ready structures, source-linked summaries, and practical management views.

Governed AI and document intelligence

Design retrieval, extraction, summarization, and bounded agent workflows with traceability and human review.

Custom software and automation

Build focused portals, trackers, integrations, Microsoft 365 workflows, and automation when existing tools cannot carry the process.

02

WHY PROFILEAI

- **Start with the real workflow.** Technology is shaped around the operating problem, evidence, owners, and decision rhythm.
- **Preserve source truth.** Outputs retain lineage, assumptions, confidence, and review boundaries instead of hiding them.
- **Build only what earns its place.** Use existing tools first, then add focused software or AI where it creates measurable relief.
- **Leave behind an operating asset.** Engagements produce reusable workflows, schemas, dashboards, playbooks, and verification gates.

03

KEY-PERSONNEL EXPERIENCE

Founder-led delivery grounded in complex operations

More than 20 years of key-personnel experience across U.S. Navy aviation, defense logistics, aircraft maintenance and quality assurance, systems safety, acquisition support, program management, data modernization, and decision support. This experience is presented as key-personnel background, not ProfileAI corporate past performance.

NAICS

541511	Custom Computer Programming Services
541512	Computer Systems Design Services
541519	Other Computer Related Services
541611	Administrative Management and General Management Consulting Services

TEAMING FIT

Subcontracting, focused pilots, prototype-to-production support, workflow and reporting modernization, data integration, human-reviewed AI, program-office decision support, and documentation modernization.
